

The background features a light gray 3D staircase pattern receding into the distance. Overlaid on this are large, diagonal, semi-transparent geometric shapes in teal, light green, and dark purple. The text is centered over the staircase.

PMX 2026

THE PRODUCT MANAGEMENT EXPEDITION

presented by Bhavya Bharti

 SOCIO-ECONOMIC & CULTURAL CONTEXT

-  • **Lower-middle to middle-income** households
-  • Often **first-generation English speakers** or graduates
-  • Limited access to elite networks or mentorship
-  • **Social Reality:** They face the "Cringe" label from urban users when they attempt to create content

 ASPIRATIONAL DRIVERS

-  • Express without fear of ridicule; build a credible digital identity
-  • **Economic Mobility:** Transition from being "passive consumers" to "earners"
-  • **Productive Engagement:** Overcome "productivity guilt"—the feeling of "wasted time" after consuming short-form dramas—by finding content that provides real-world value

 DIGITAL BEHAVIOUR

-  • **Fragmented Usage:** Journey is scattered
-  • **Multi-platform hopping:** Discover → consume → share → forget
-  • **Heavy WhatsApp Sharing:** 30–50% of these users share content to WhatsApp Status daily, though the information is lost after 24 hours.
- **Algorithmic Anxiety:** They experience "posting as gambling," often deleting content if it doesn't get immediate reach

TAM

 PAIN INTENSITY SUMMARY

-  • **High Emotional Stakes:** "Virality Pressure" and "Monetization Disillusionment" show that users are deeply invested but easily discouraged.
-  • **The Engagement Paradox:** Digital usage remains largely passive due to an "Aesthetic Mismatch"
-  • **Systemic Fragmentation:** A scattered user journey from "WhatsApp Chaos" to platform hopping leads to lost progress
-  • **Volatility & Burnout:** Creates a volatile experience that frequently leads to user burnout and platform exit.

Problem Area	Frequency	Emotional Depth	Drop-off Risk
Virality pressure	↑ High	⚠ Very High	⚠ Very High
Passive consumption	🕒 Daily	⚠ High	↓ Medium
Fragmentation	∞ Continuous	⚠ Medium-High	↓ High
Monetization disalusionnment	📅 Periodic	📅 High	⚠ Very High
Aesthetic miatsach	🕒 Daily	🕒 High	⚠ Medium
WhatsApp chaos	💬 Weekly	⚠ Medium	⚠ Medium

LAYER 1:

THE CORE PARADIGM SHIFT

The Problem ('The Anxiety Loop')

The Barrier to Entry

- Intimidation by polished standards
- Paralysing fear of judgment
- Lack of structured learning, success is a random lottery

Key Friction

Fear of ridicule ("Log kya kahenge"), lack of structured learning, random algorithmic failure.

The User Journey to Failure

Post Content → Pray for Validation (Likes) → Face Silence or Ridicule → Delete & Feel Bad → Post Content

The Solution ("The Growth Loop")

Core Value Proposition :

Turn time into visible progress, confidence, and economic opportunity-without fear of judgment.

Practice Privately (Safe Sandbox)

Get Mentored Feedback

Iterate & Improve Skills

Graduate to Public Platform

Earn Opportunity & Recognition

Result:

Visible progress, lasting confidence, and economic mobility

LAYER 2: SOLUTION LAYER

THE 'NET PRACTICE' ARCHITECTURE (3-STAGE FUNNEL)

STAGE 1: PRIVATE PRACTICE ('The Mirror')

LOCKED TO SELF (0% Risk)

Innovation:

AI-Driven Objective Coach.

Uses on-device Voice & Vision AI for technical feedback—no human eyes involved.

GOAL:

Build "Muscle Memory" & normalise creation without social cost.

STAGE 2: CIRCLE PRACTICE ('The Squad')

SEMI-PUBLIC (Peers/ Mentors Only)

Best part?

Energy / Script / Humor

Innovation:

Structured Forms (No Open Comments)

Disables trolling. Feedback is restricted to constructive, voted parameters.

GOAL:

Validate quality in a safe environment. Improvement over judgment.

STAGE 3: PUBLIC GRADUATION ('The Stage')

MAIN FEED / GLOBAL

Passes threshold or user explicitly chooses to "Graduate"

Innovation:

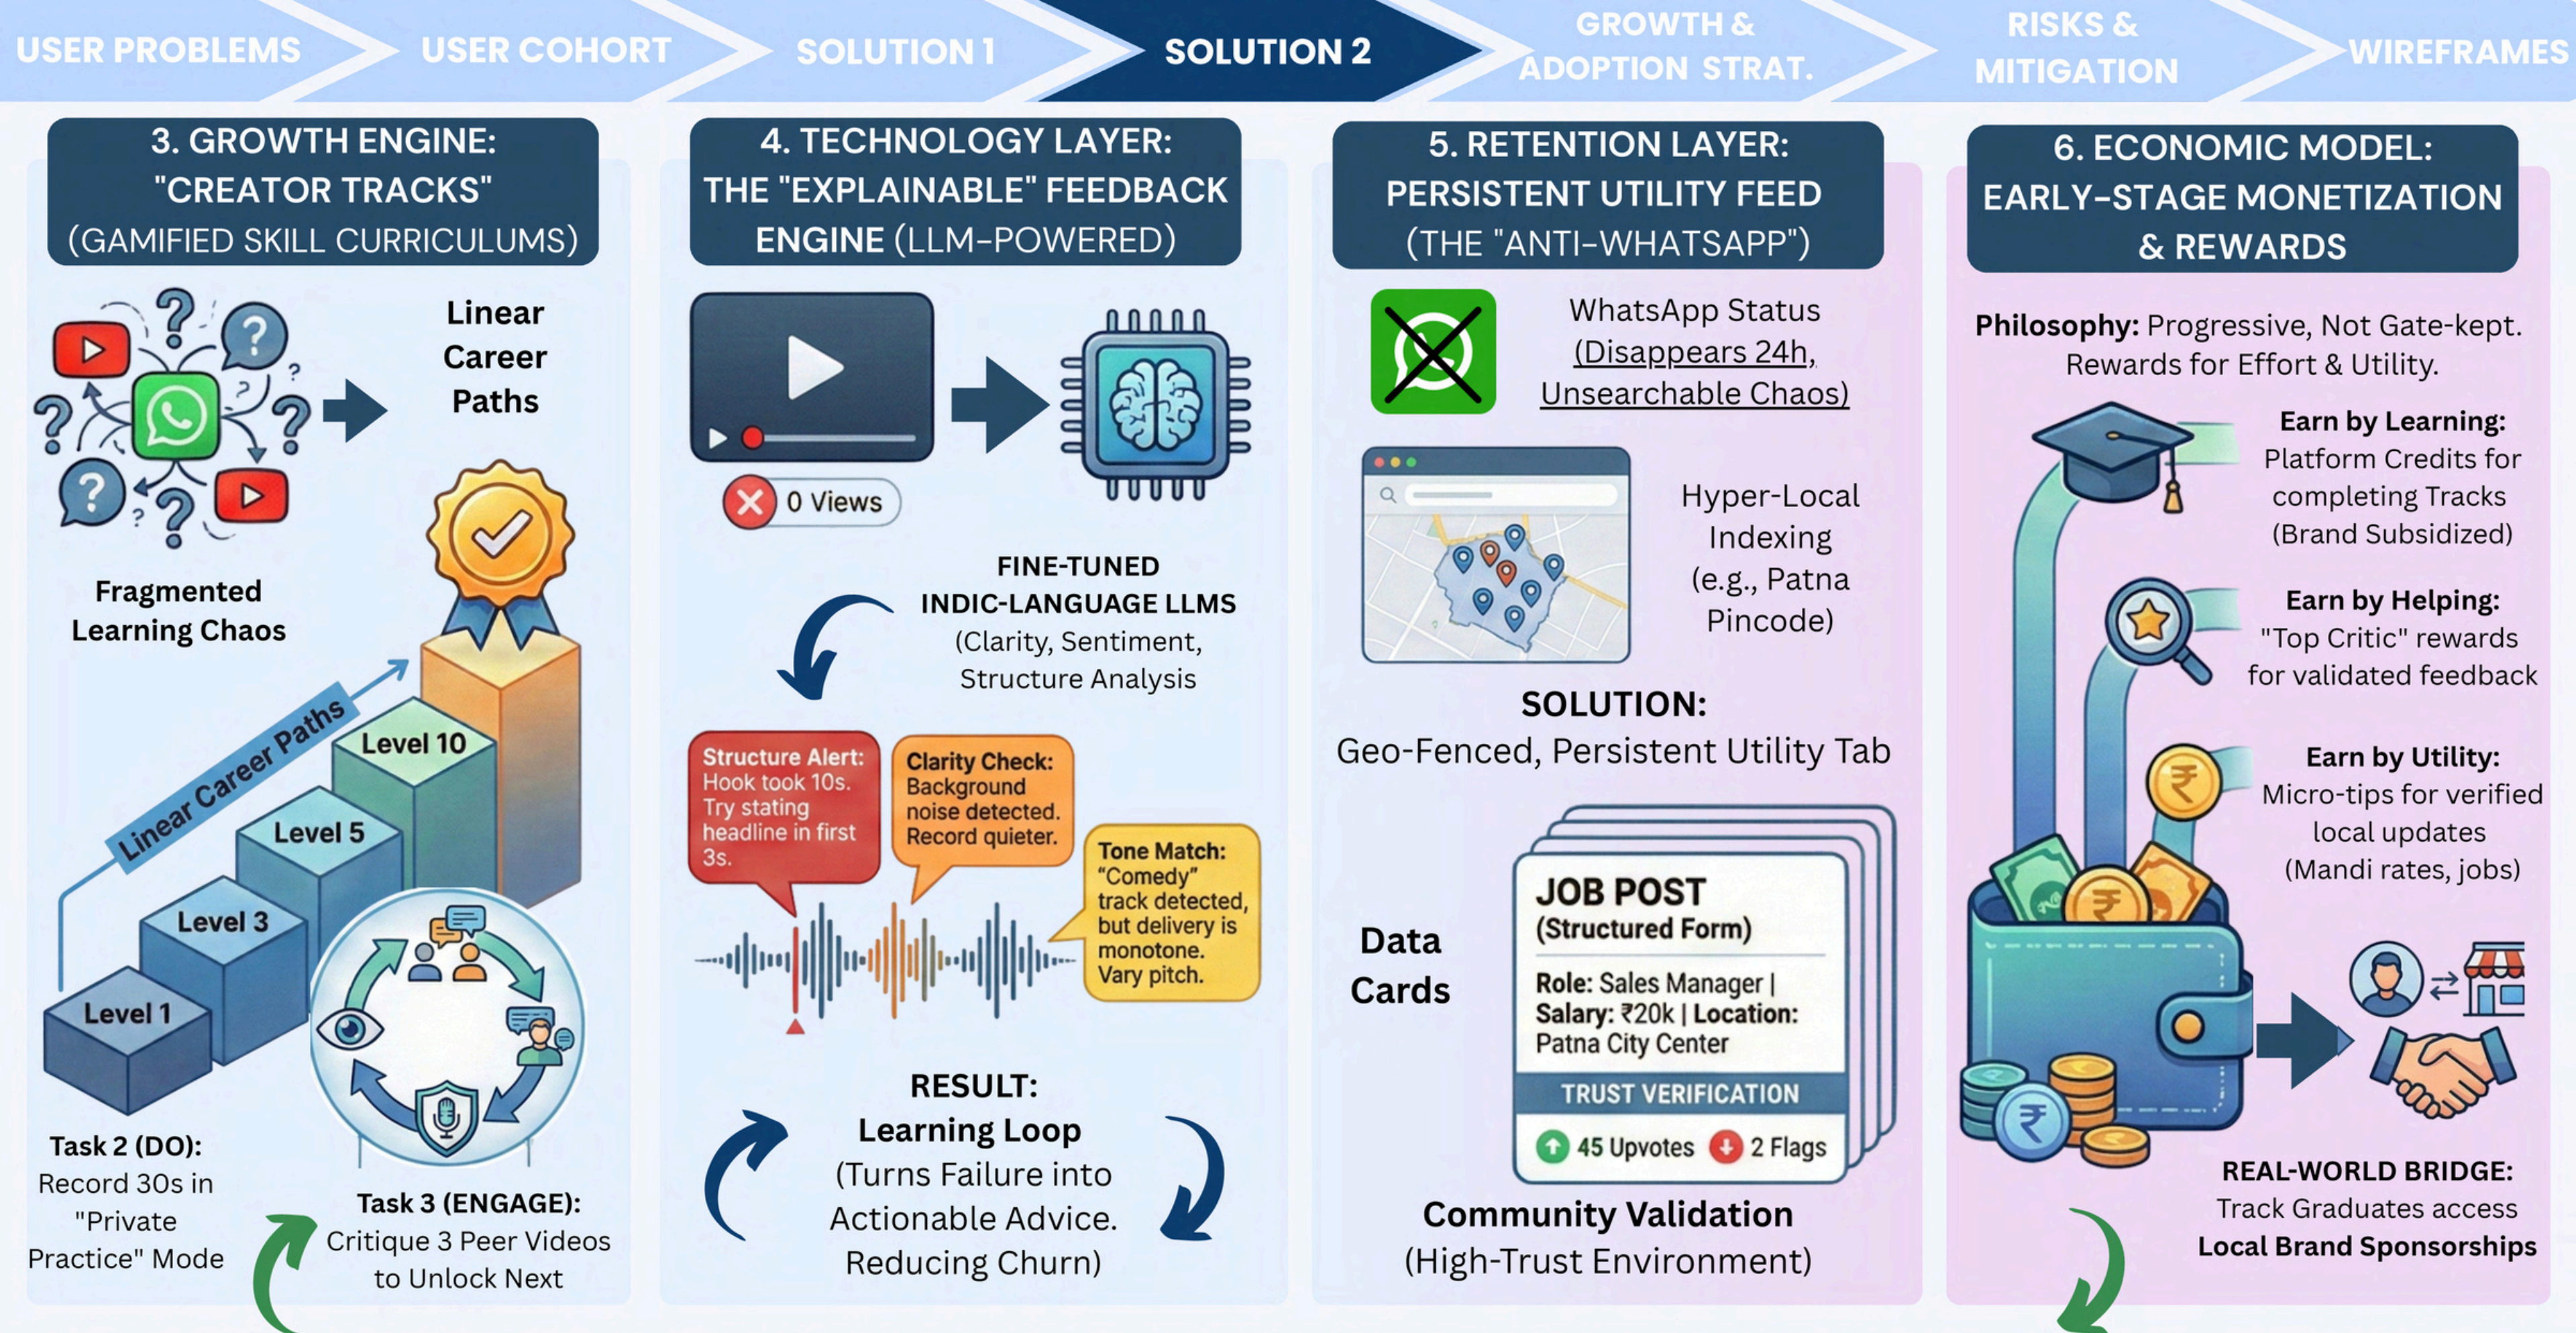

The "Confidence Score" Gate

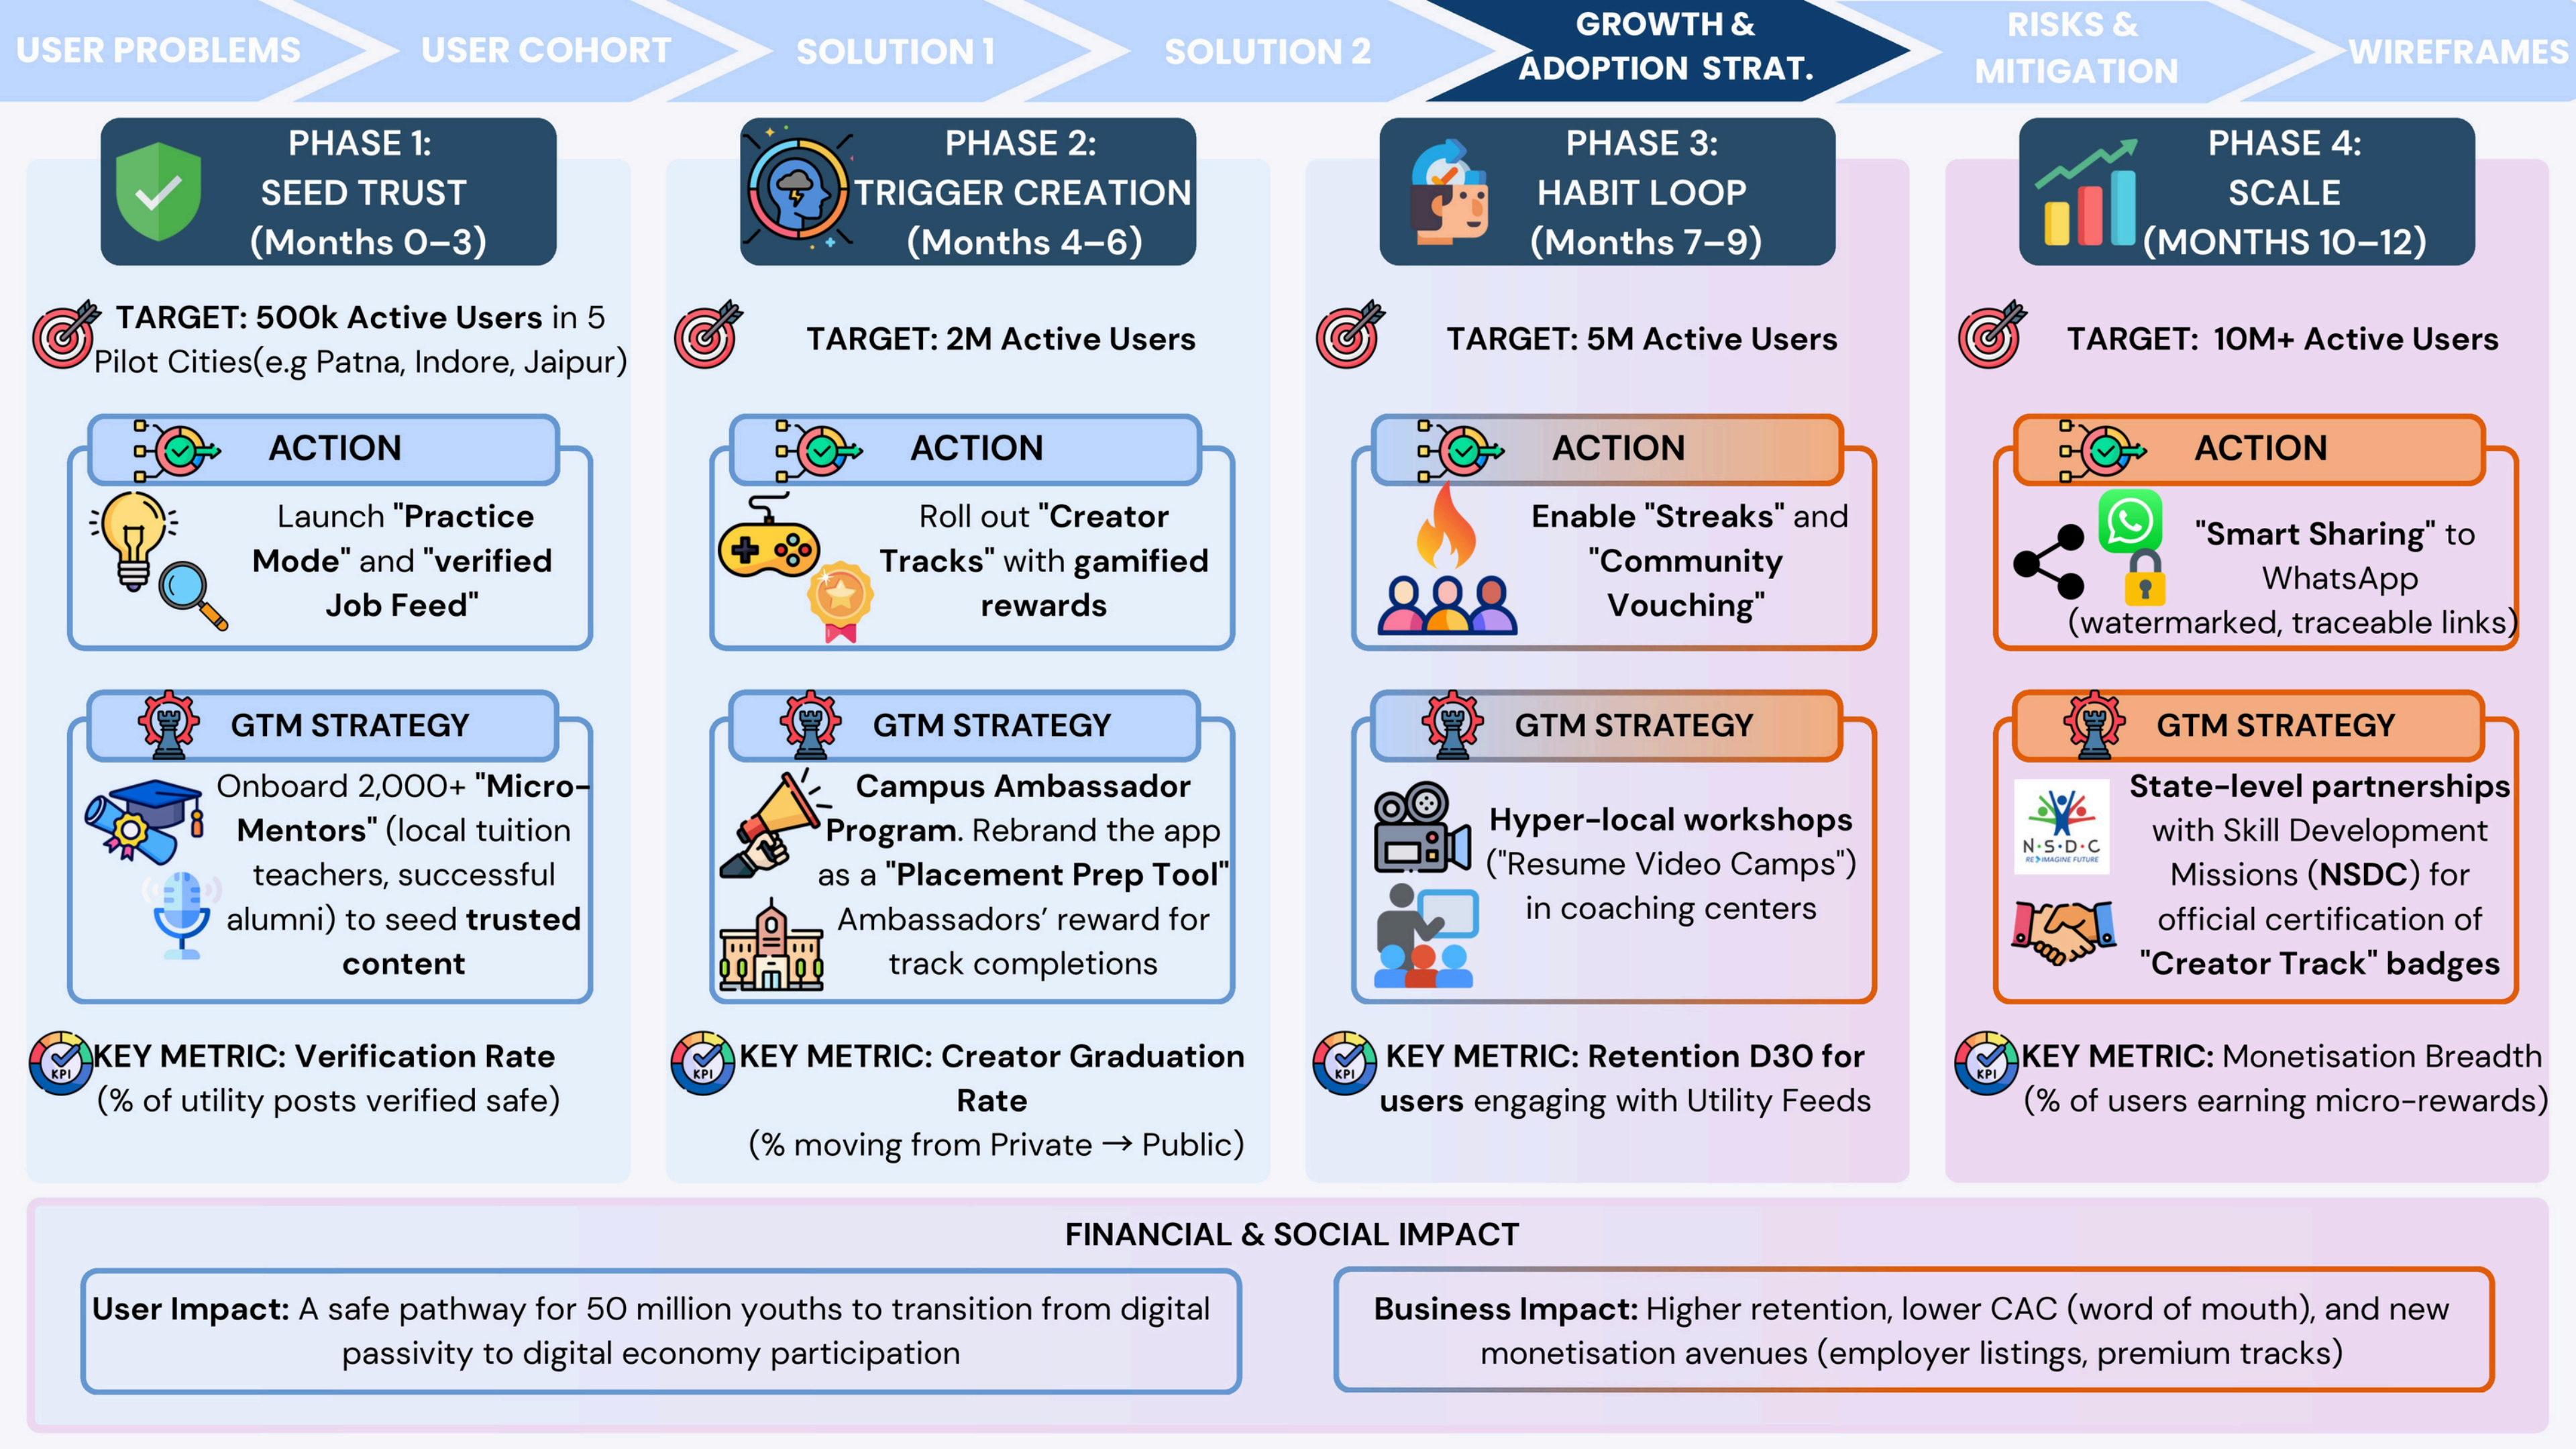

Content only hits the main feed after passing a peer validation threshold. (Regional-First distribution).

GOAL:

Eliminate "First Post Trauma" and ensure high-quality main feed content.

The Net Practice architecture ensures that by the time a user faces the public, they are prepared, validated, and confident-turning creation from a stressor into a skill.

RISK CLUSTER A
TRUST & VERIFICATION
(The "Fake Job" Crisis)

 **THE RISK:** Scams, fake offer letters, data harvesting via sophisticated fraud

 **MITIGATION 1**

'Trust Rank' Algorithm
(Hybrid AI Stack)
LSTM Textual Analysis, Metadata fingerprinting, Resolution (Govt APIs)

 **MITIGATION 2**

Community 'Vouching' Protocol.
Reputation Scores, 'Vouch' Button for local validation, **'Community Verified'** Tag

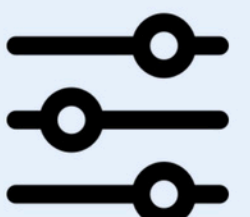

RISK CLUSTER B
PSYCHOLOGICAL SAFETY & FEEDBACK ANXIETY

 **THE RISK:** Sensitive users abandoning app due to tone deaf AI feedback

 **MITIGATION 1**

'Sandwich' Feedback protocol
Tone calibration (Validate, correct, encourage), objective separation

 **MITIGATION 2**

User Controlled Critique
Pre Mortem Options ('What to critique?'), agency reduces anxiety

RISK CLUSTER C
GAMIFICATION ABUSE
(THE "FARMING" EFFECT)

 **THE RISK:** Users 'Gaming' Creator Tracks for rewards with low quality content

 **MITIGATION 1**

'Proof of Effort' verification
Multimodal AI Content Analysis, velocity limits on rewards

 **MITIGATION 2**

Intrinsic Value Shift
Status over cash (Badges, 'Mentor' Titles), Harder to farm

RISK CLUSTER D
THE COLD START PROBLEM (ADOPTION)

 **THE RISK:** Empty 'Utility Feed' in new locations leading to user churn

 **MITIGATION 1**

'Atomic Network; & Concentric Expansion
Dynamic Radius (5km, District → 20km, Zone) ensures content

 **MITIGATION 2**

Seeding 'Evergreen' Utility
Pre-populate location-agnostic, high-value content ('Fake Door' strategy)

WIREFRAMES

Progress Mode ('Udaan' Feed)

Progress Bar Visual:
Indicates weekly consistency and progress towards habit goals, motivating daily usage.

PROGRESS DASHBOARD →

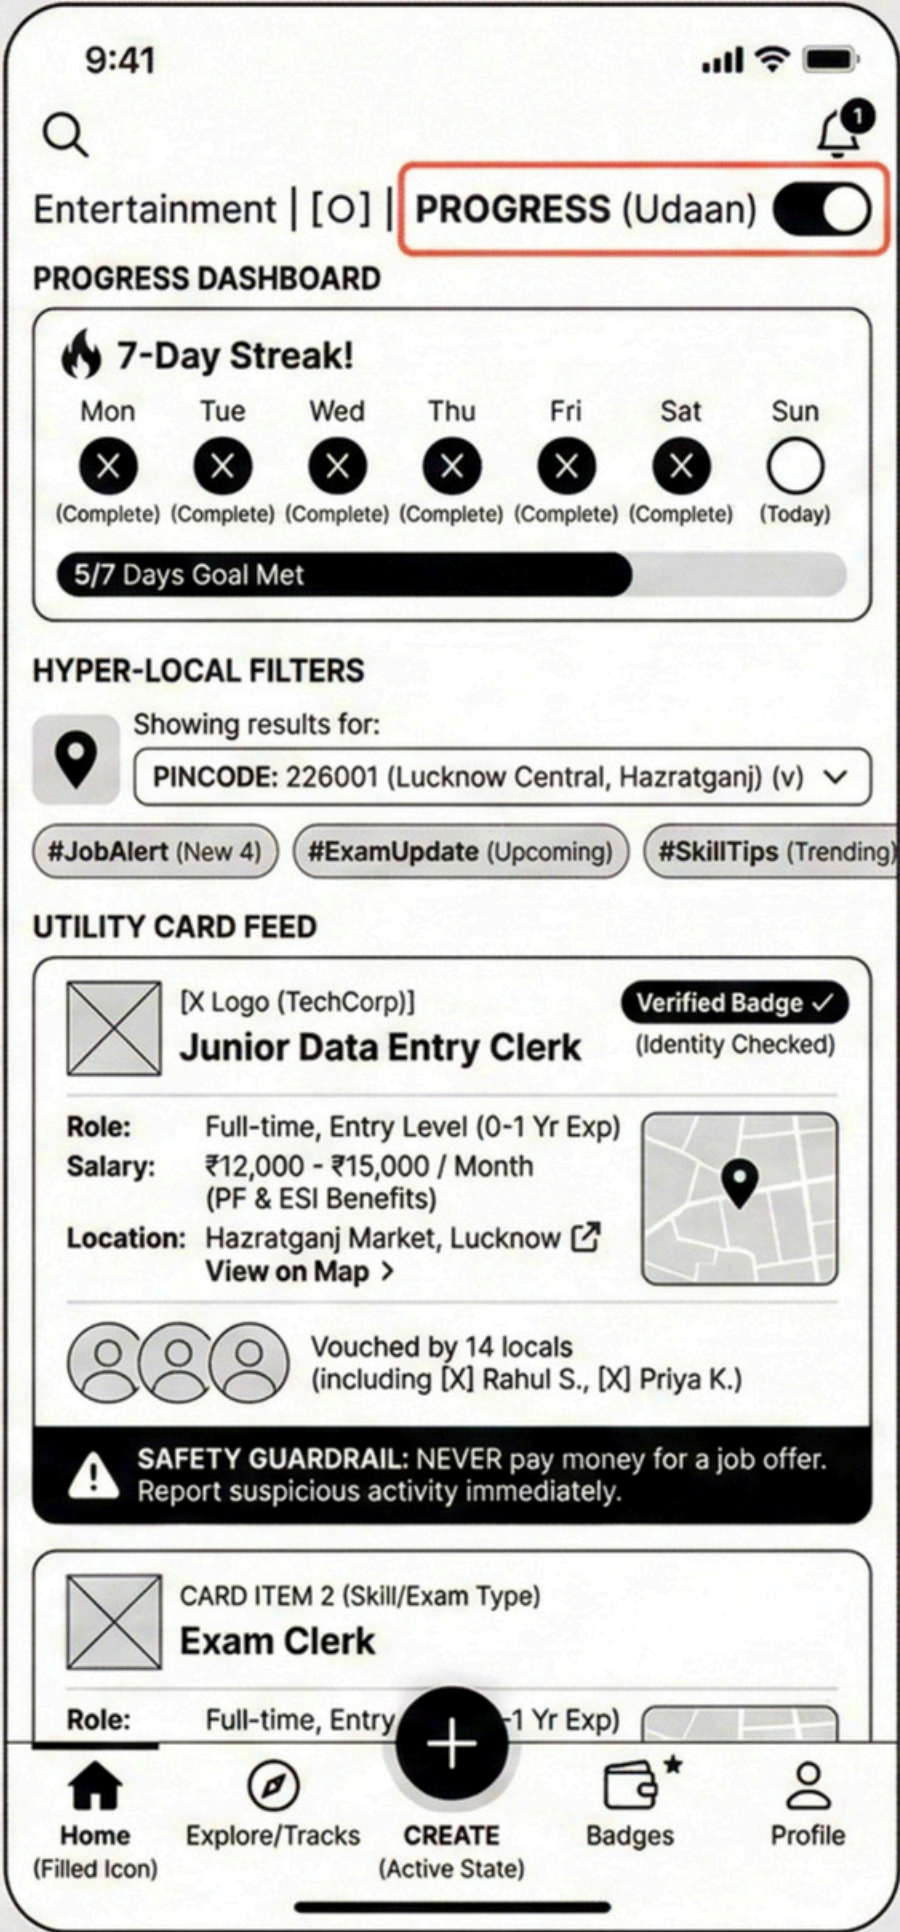

Pincode Selector:
Allows precise targeting to receive highly relevant, community-specific results for jobs and updates.

HYPER-LOCAL FILTERS →

Structured Data Fields:
Clear, concise salary, role, and location details enable quick user evaluation.

UTILITY CARD FEED →

BOTTOM NAVIGATION BAR →

← Mindset Toggle

← Daily Habit Tracker

← Location & Context Filters

← Structured, Verified Utility Card

← Social Proof & Safety Warning

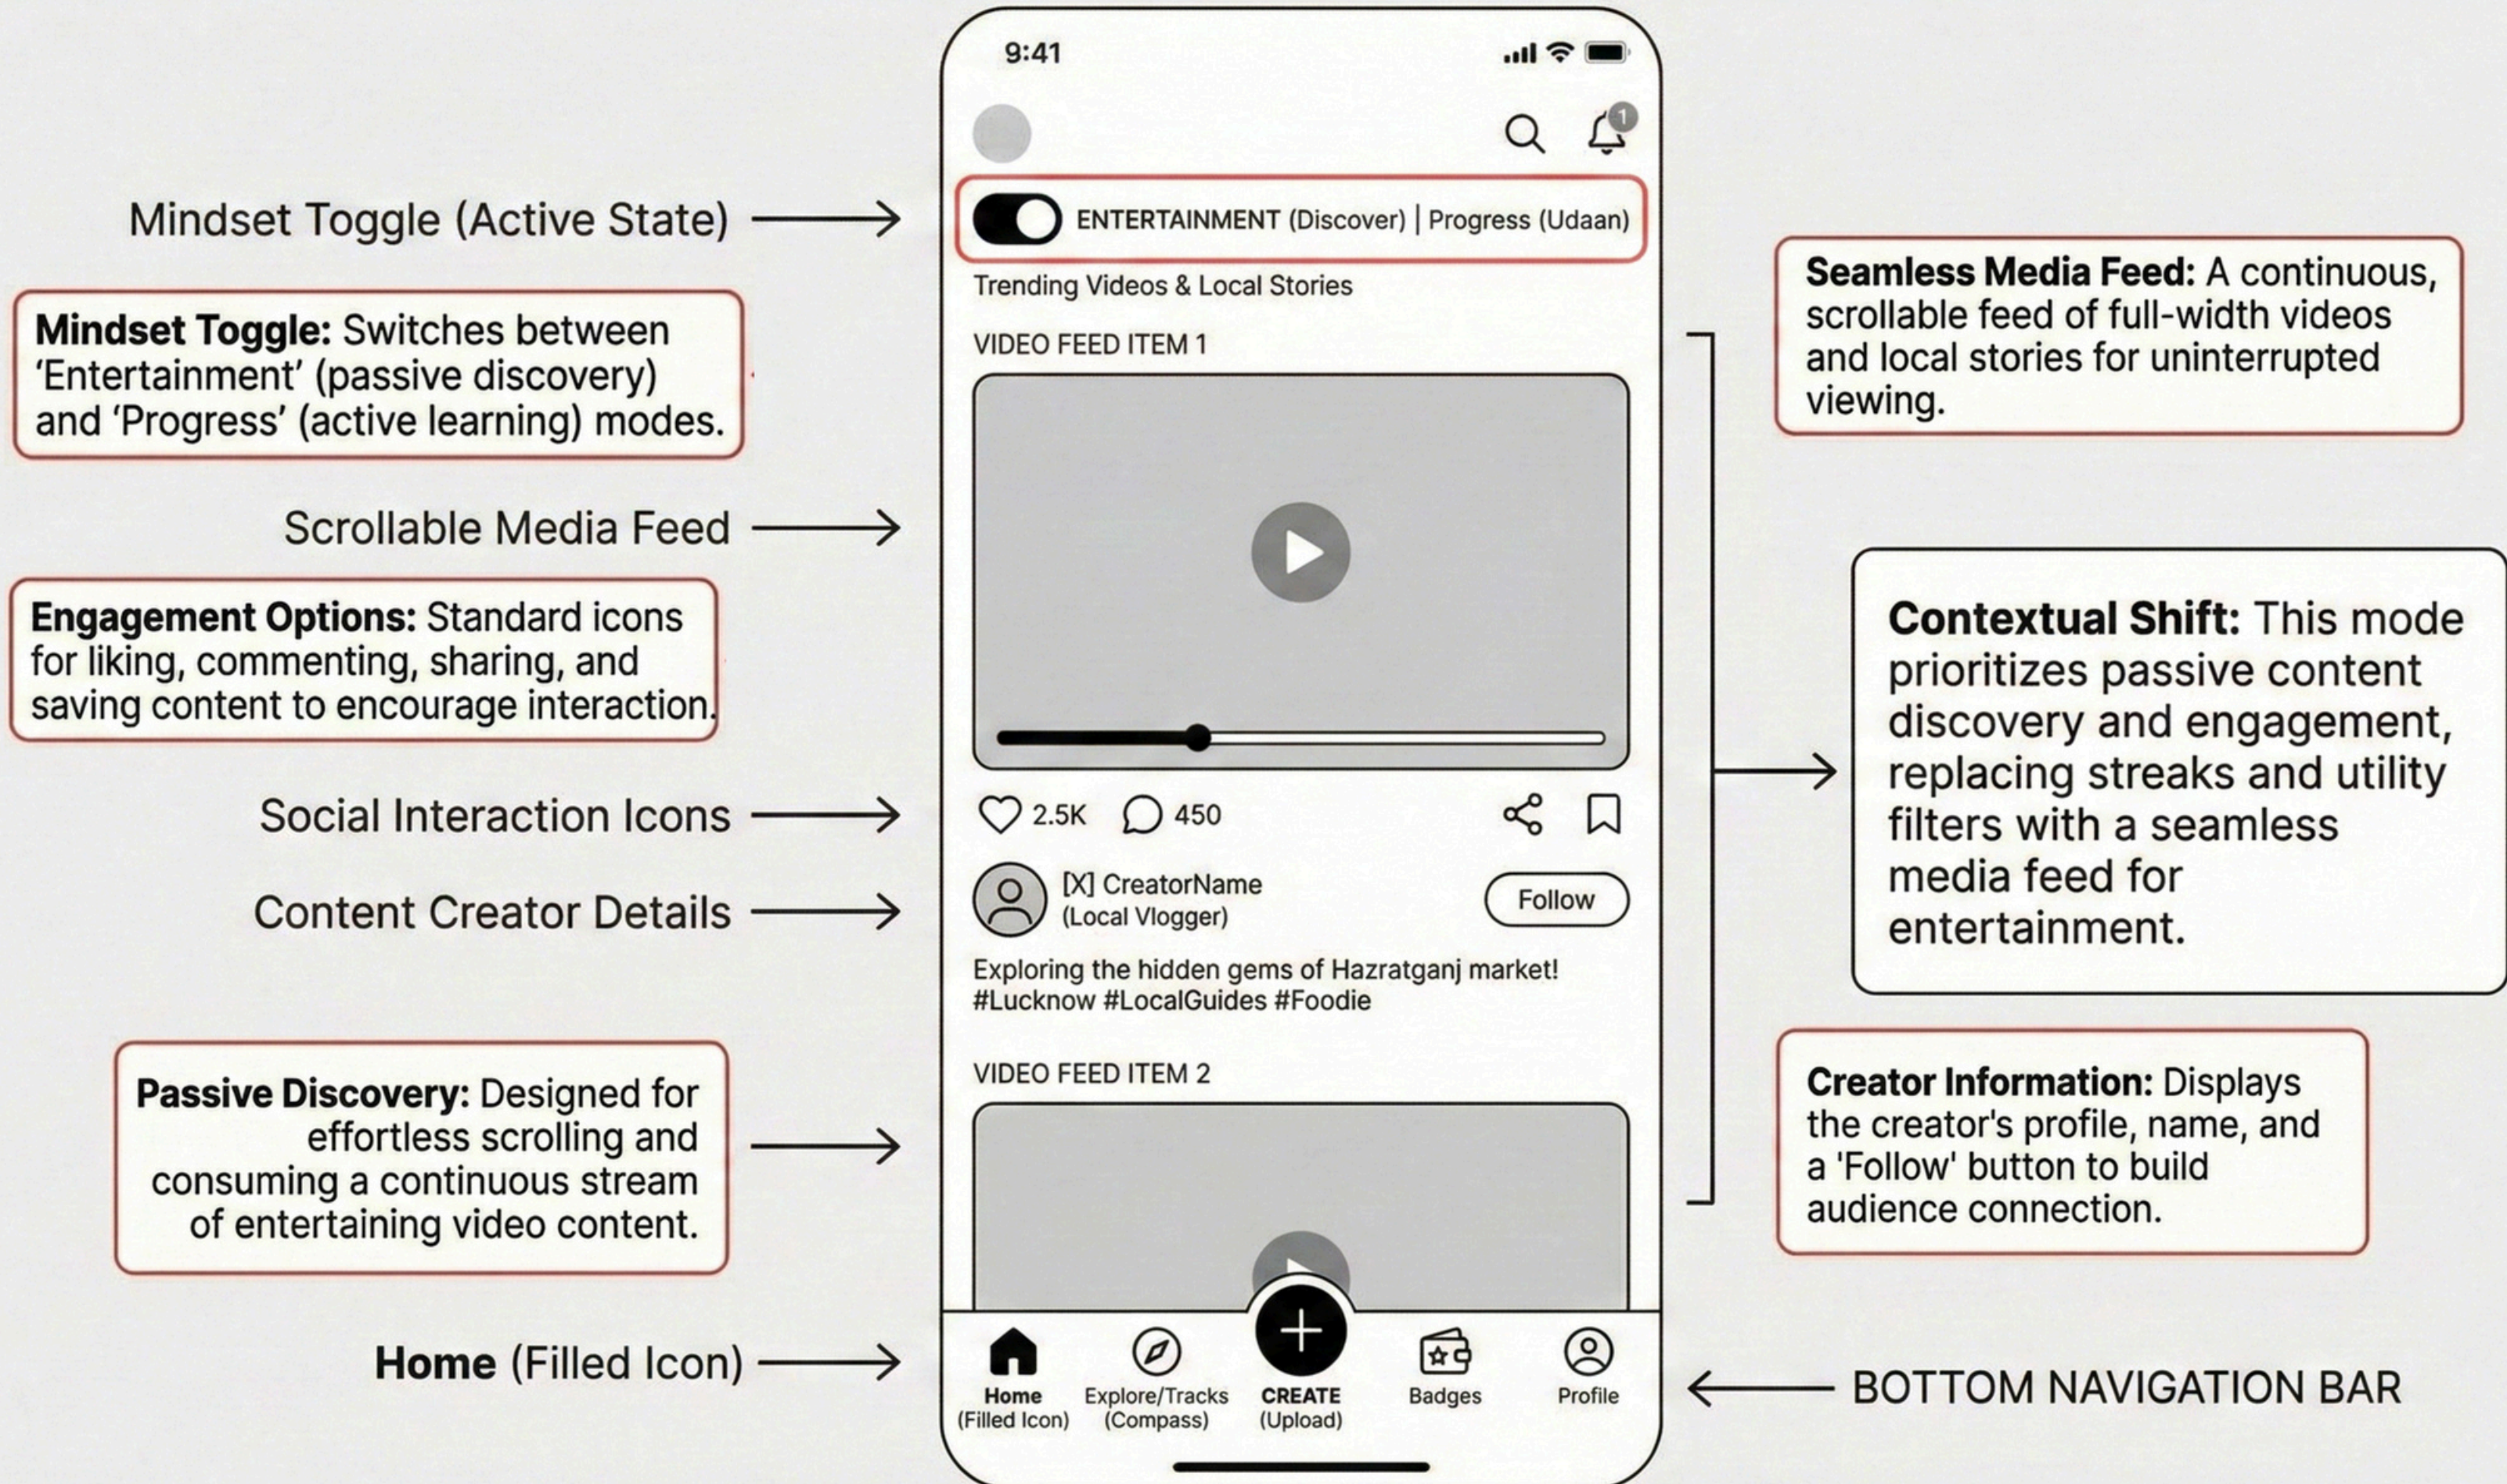

← Navigation & Creation Hub

Streak Counter:
Encourages users to return daily by visualizing their consecutive participation.

Identity Verification:
The 'Verified Badge' signals trust and authenticity, reducing the risk of scams.

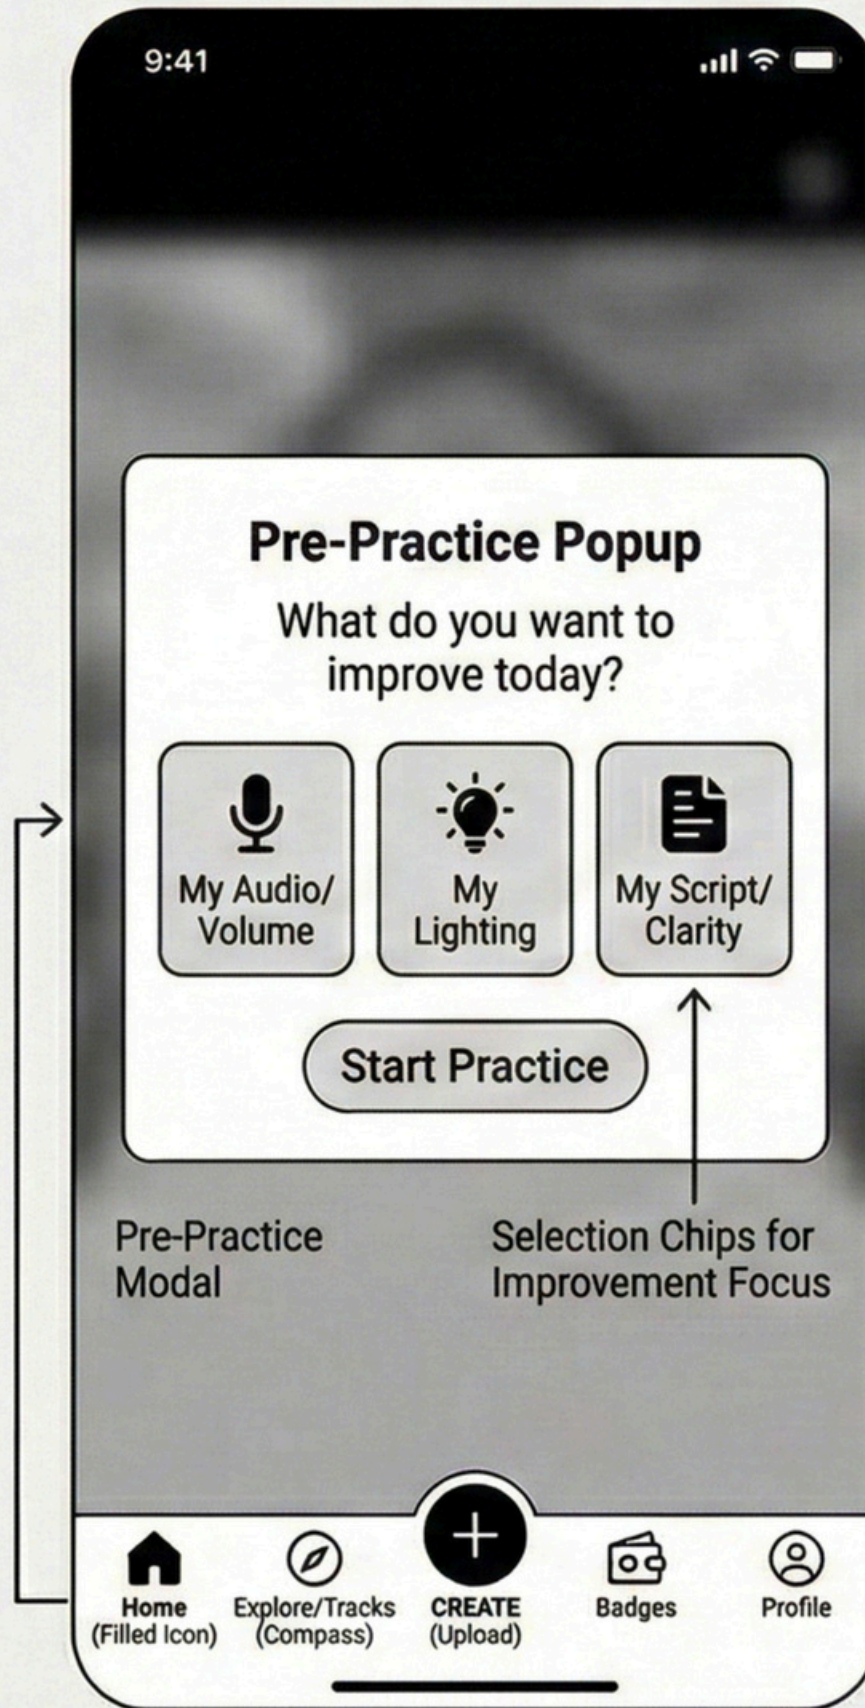

Community Vouching:
Local users' endorsements provide credibility and builds community trust in posts.

WIREFRAMES

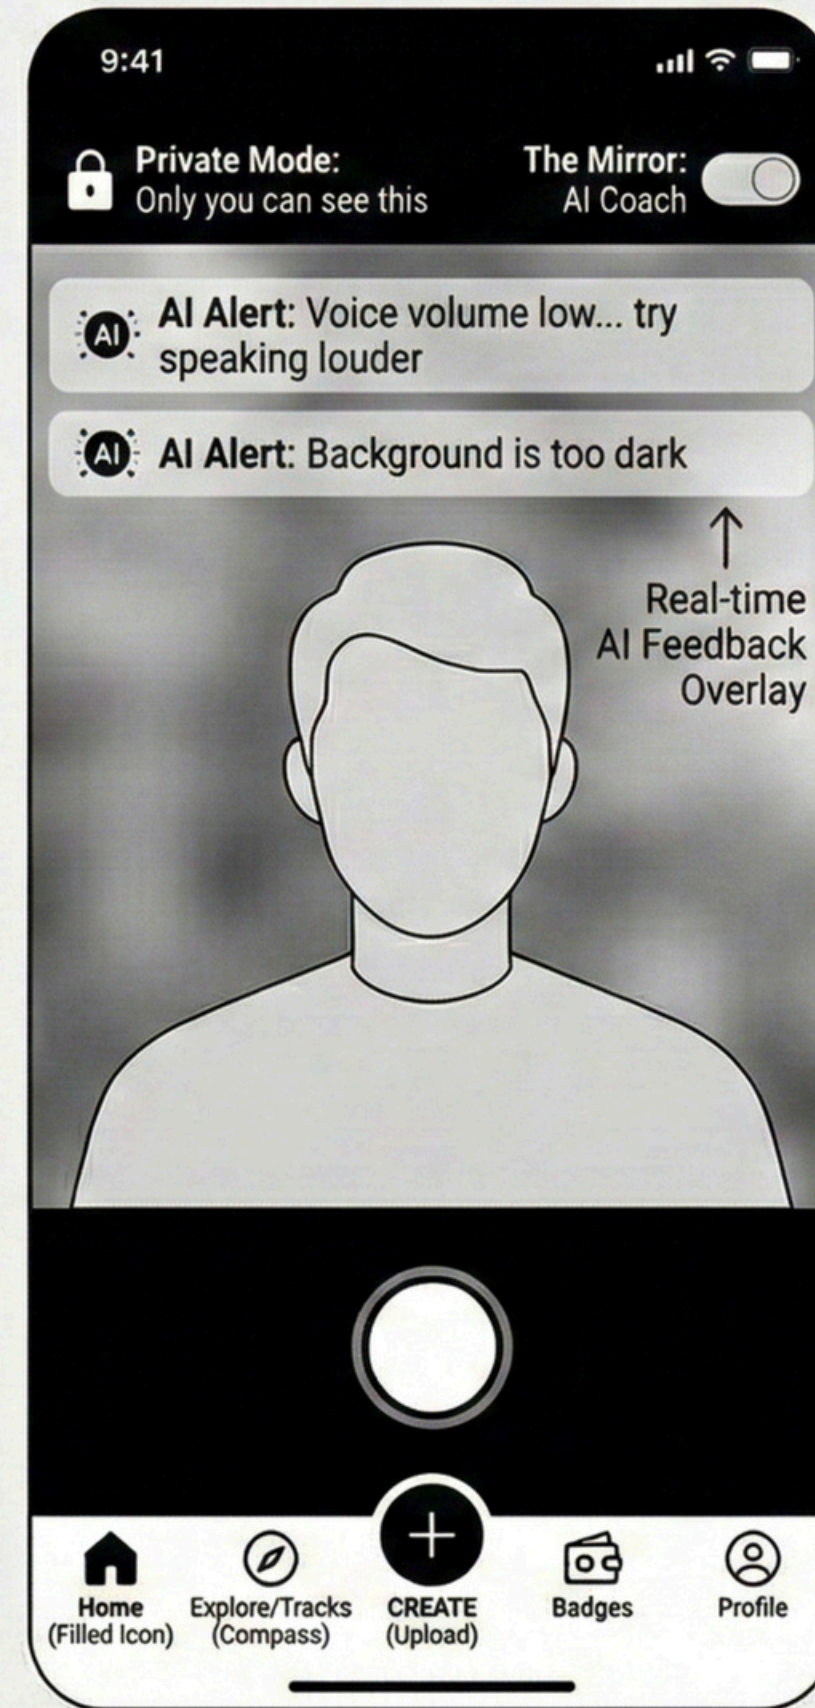

Net Practice (Safe Creation) Interface

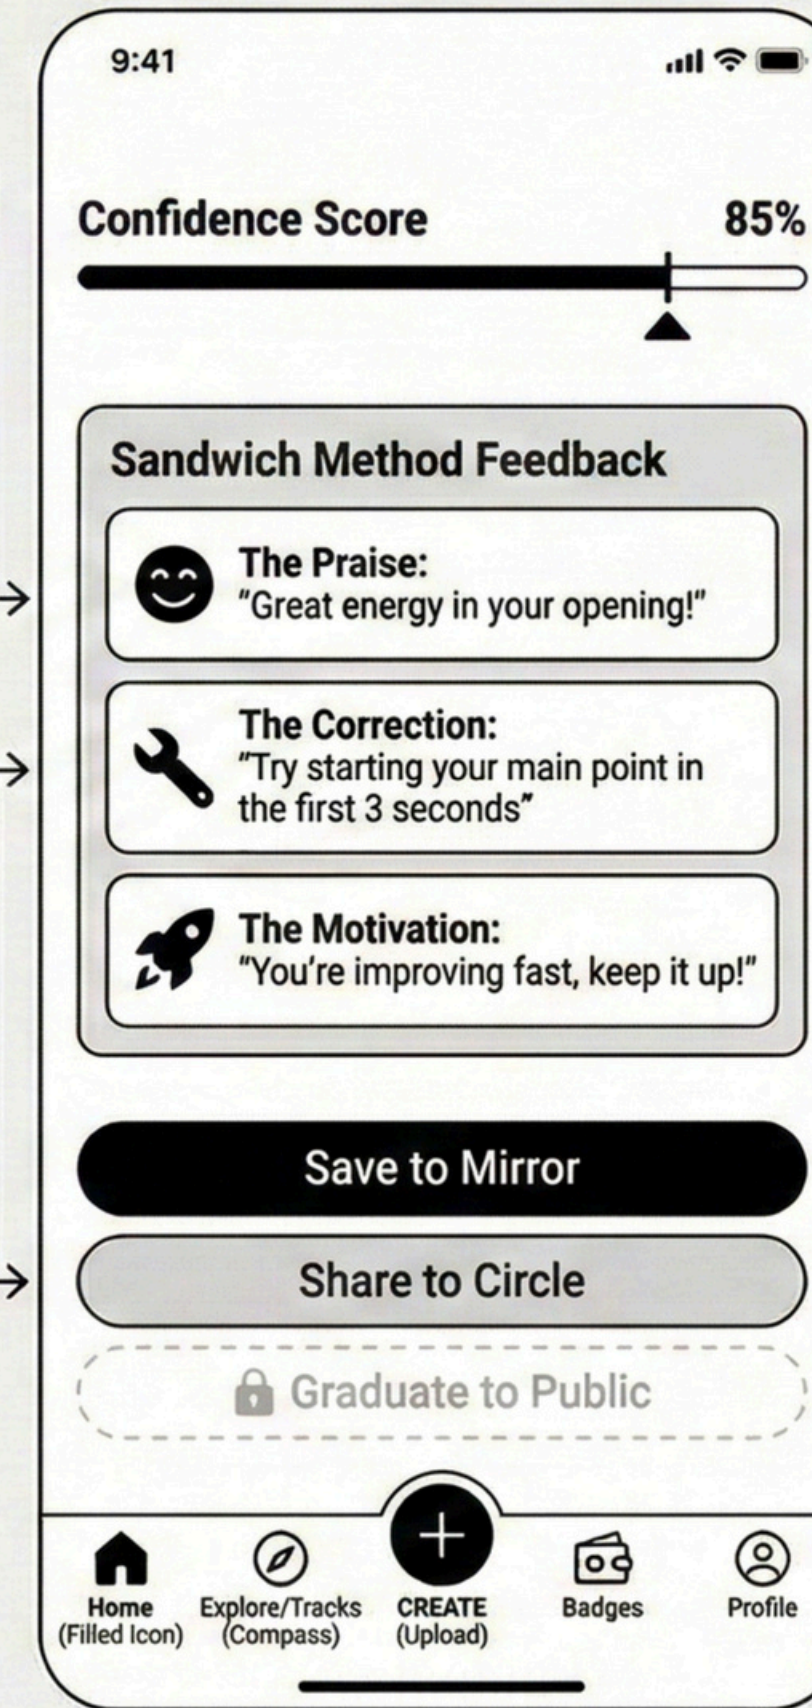

1. Entry State: The "Confidence Gate"

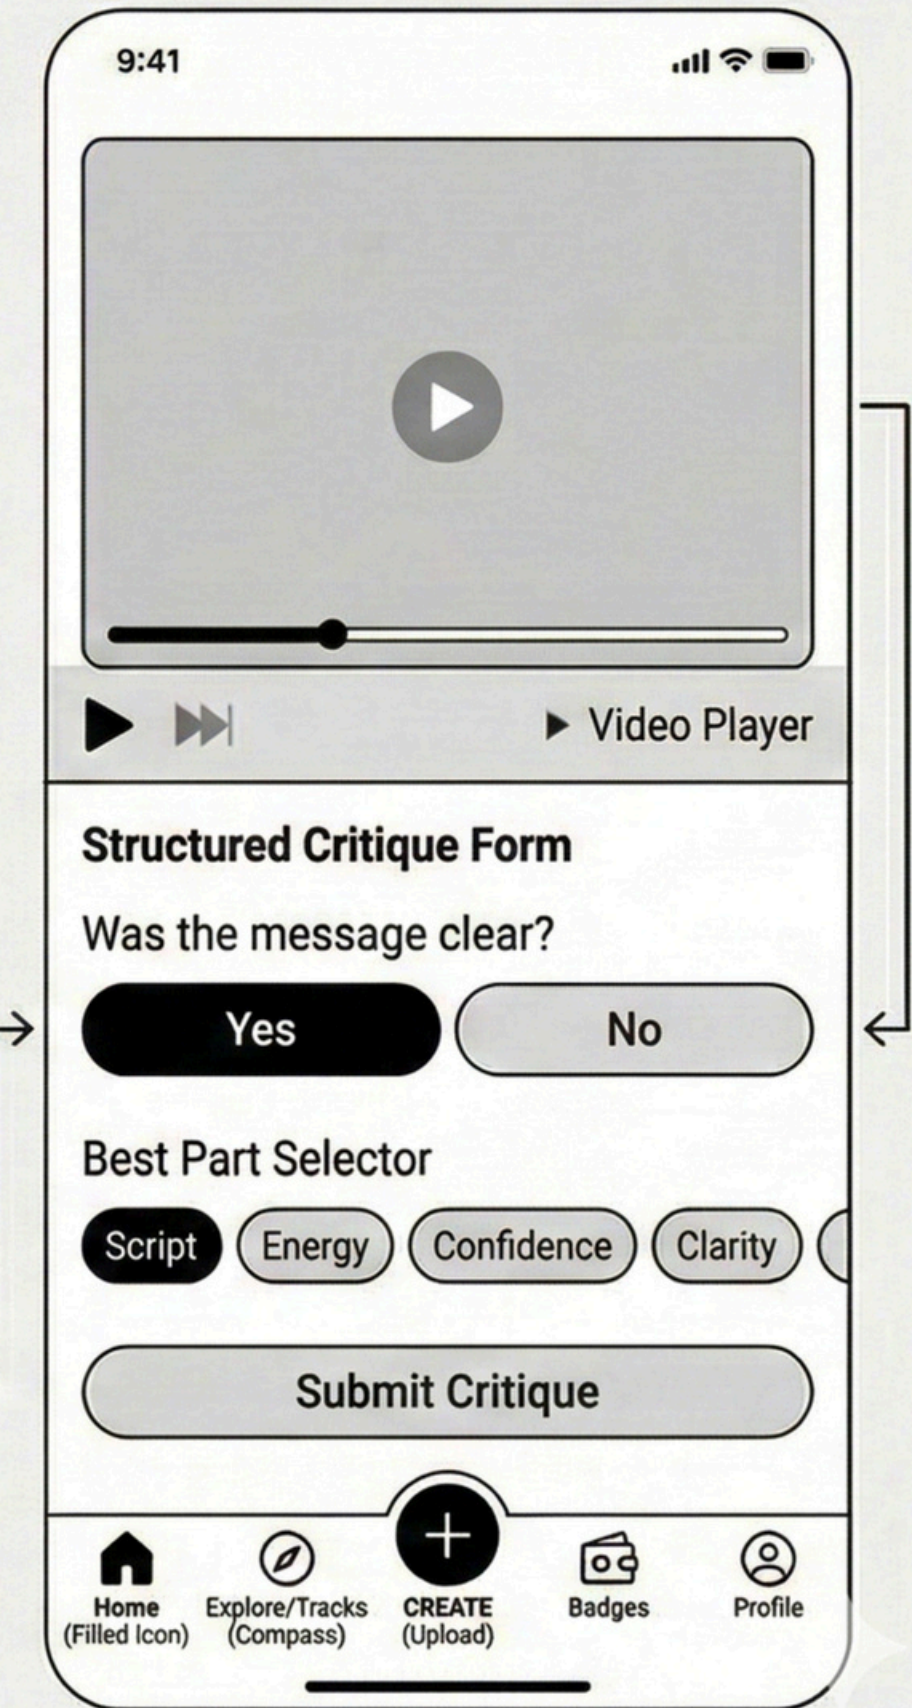

2. The Camera UI (Active State)

3. Post-Recording: "Sandwich Feedback"

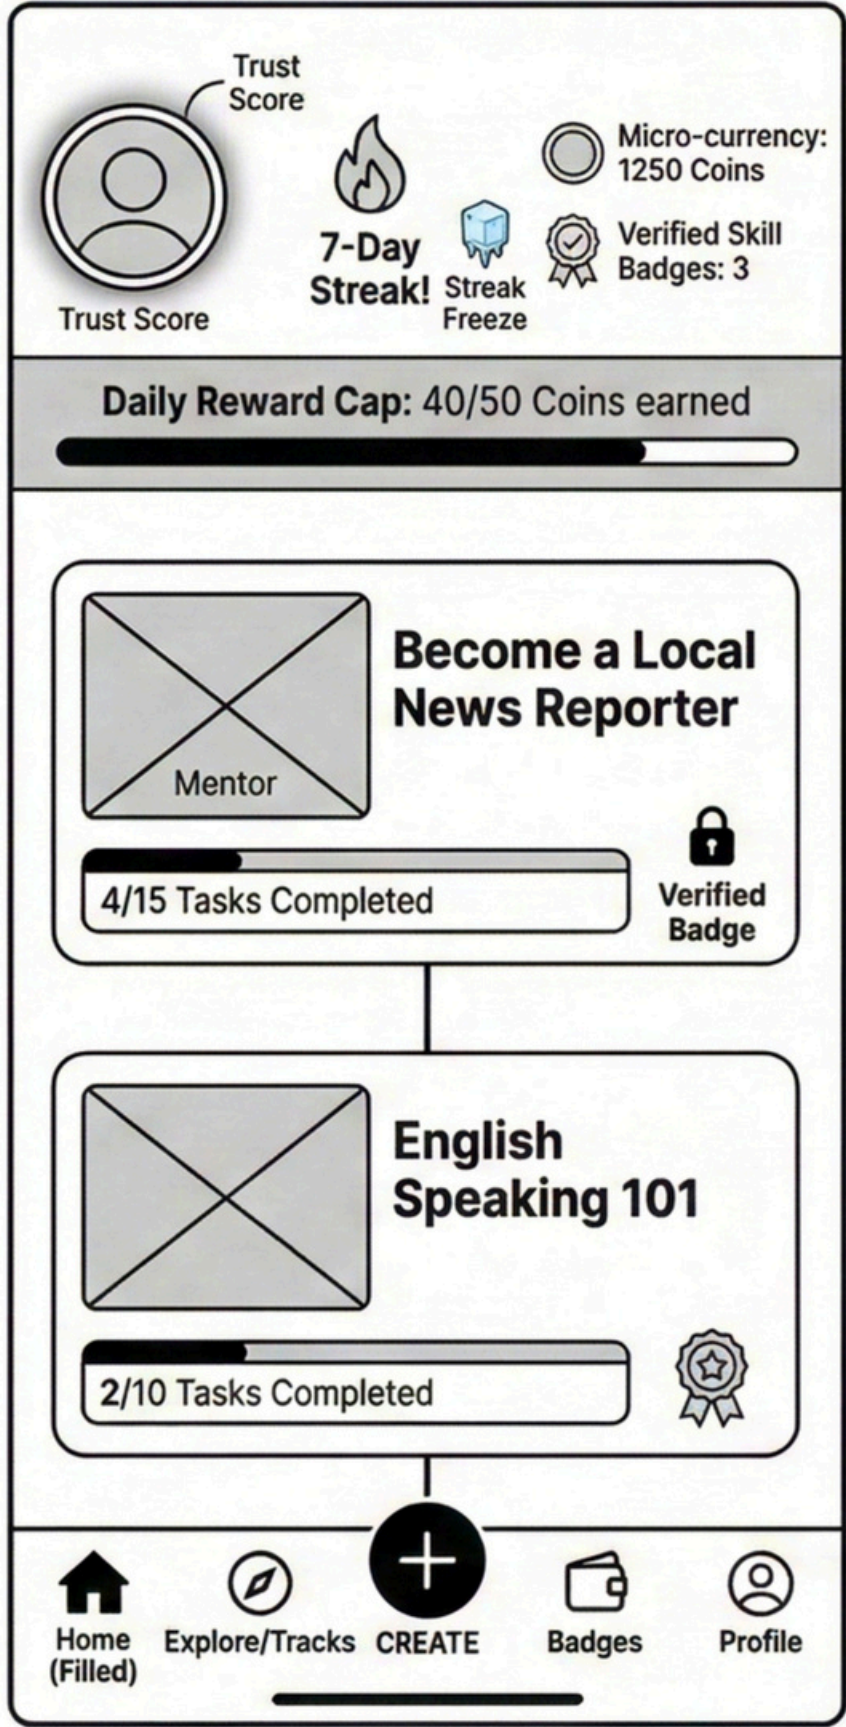

4. The "Circle" Critique UI

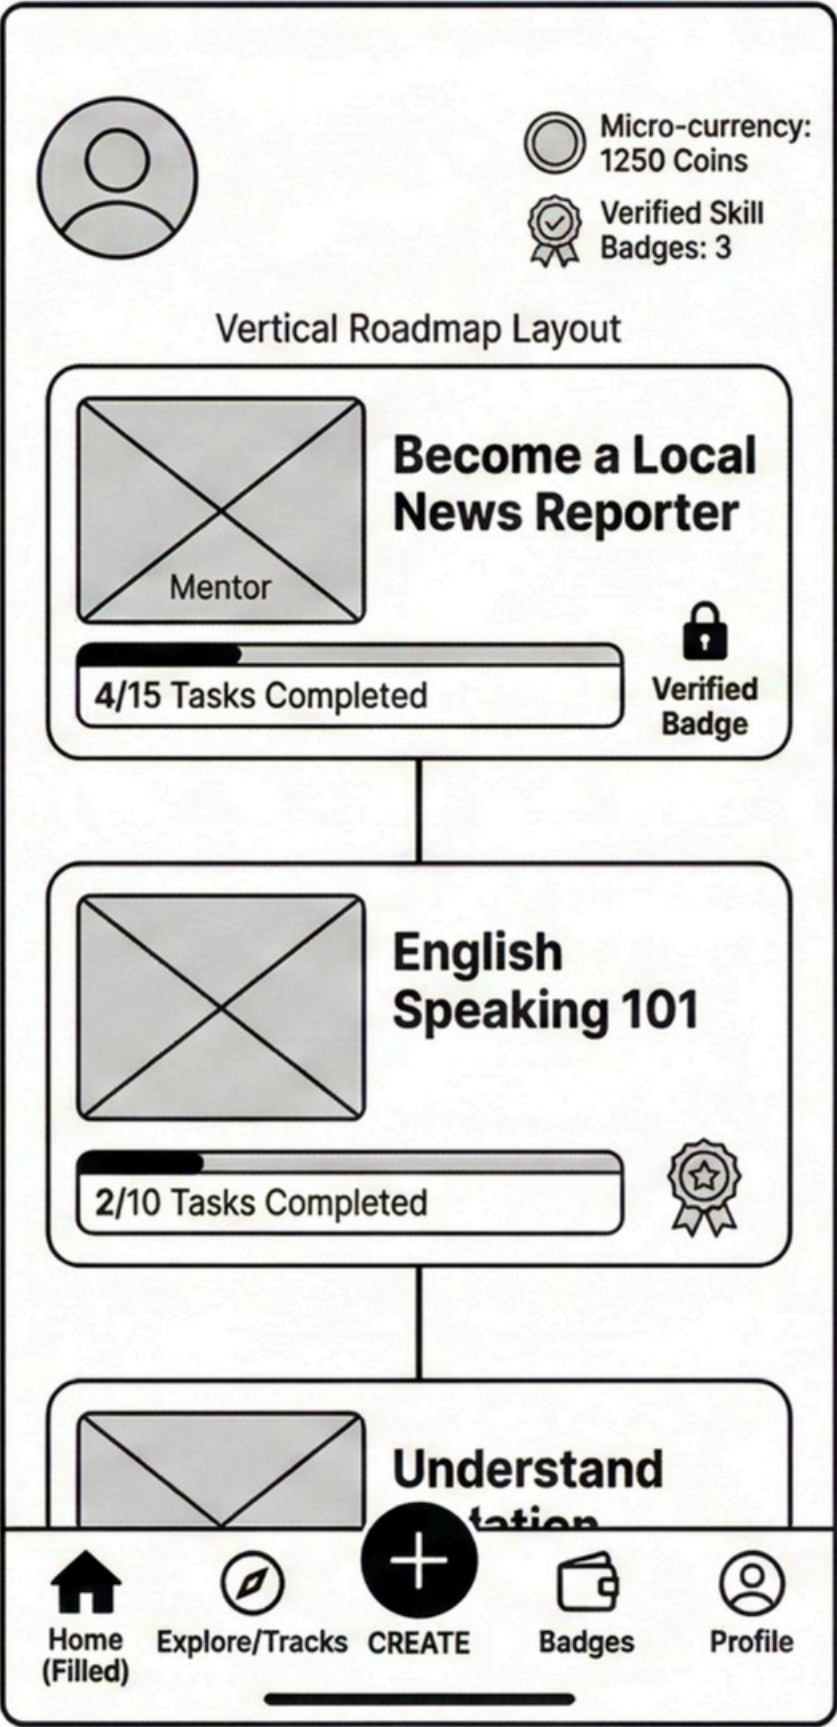

Creator Tracks (Gamified Learning Dashboard)

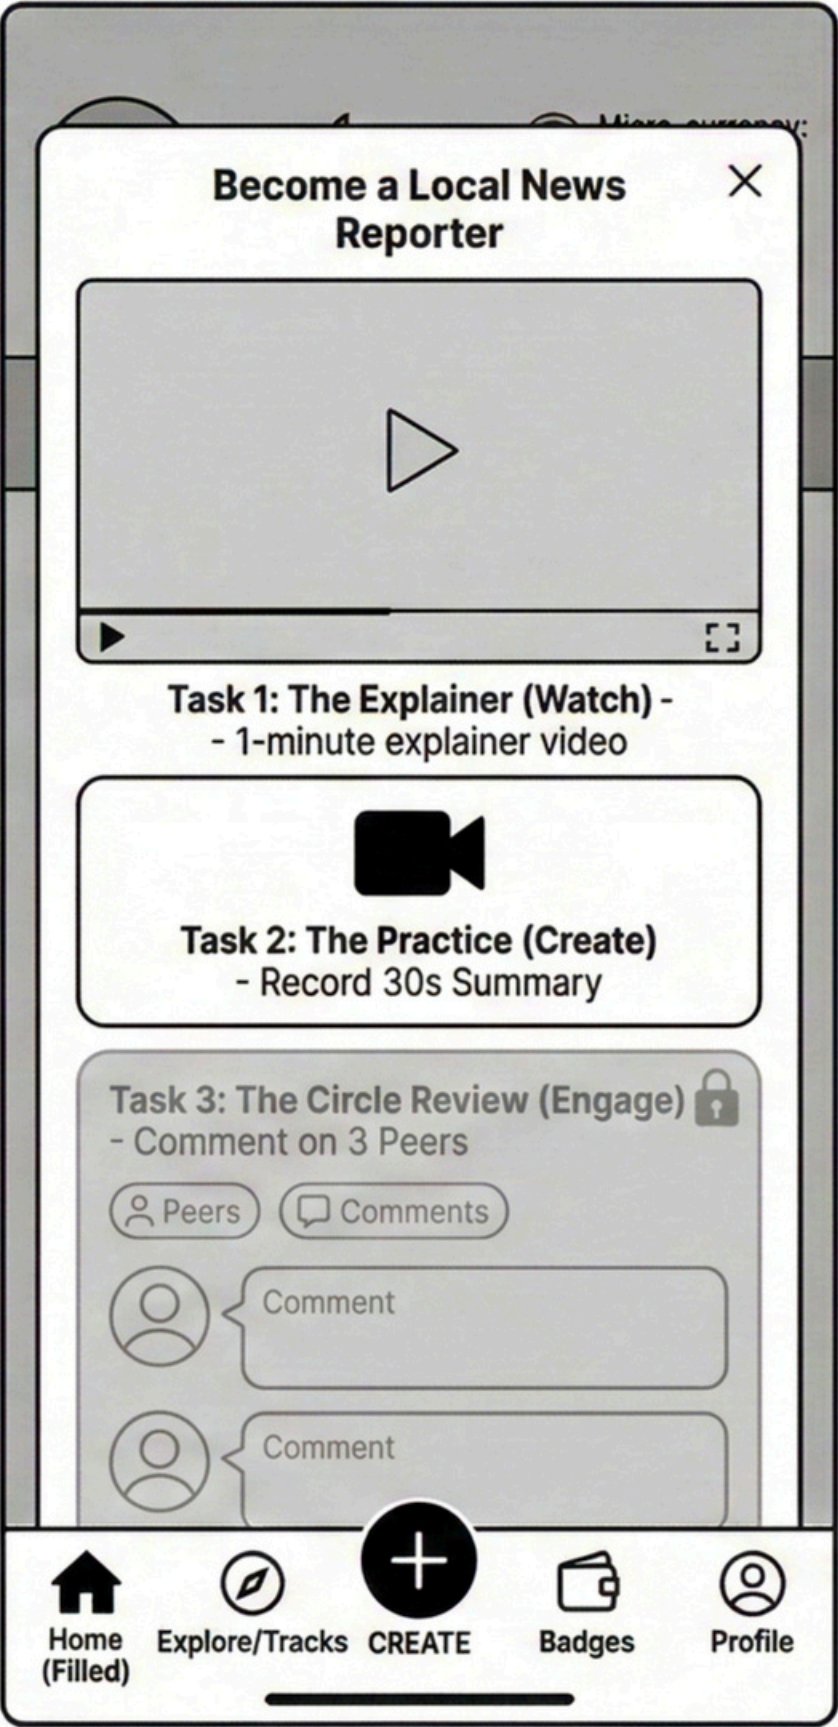

1. Dashboard Header: 'Status & Streaks'

2. The Track Selection Feed

3. Task View Interface

4. Rewards & 'Anti-Farming' UI

Persistent Utility Feed (The 'Anti-WhatsApp' Hub)

1. Main Feed: 'Hyper-Local' Control Center
